Purpose of PFOS test:

To protect the crew against exposure to dangerous substances used in firefighting systems as well as to minimize the impact on the environment, MSC 106 has approved draft amendments to prohibit the use of PFOS from both fixed and portable firefighting systems. The amendments have been adopted at MSC 107 and will enter into force on 1 January 2026.

Below inspections/tests are in accordance with MSC.107

Products containing more than 10ppm (=mg/kg) PFOS or its precursors must not be manufactured or placed on the market – this particularly includes firefighting foam agents – with no exemption.
